### Terminales del conduit

#### Tipo T

Terminal roscada para montaje de mamparo

#### Tipo G

Terminal acanalada para montaje con frenos en U o agarres

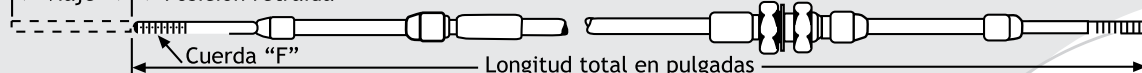

### Longitud total y viaje en pulgadas

#### Para reemplazar un cable

- Quitar el viejo cable
- Medir la longitud como se muestra abajo en pulgadas
- Medir la longitud del viaje, de 1 a 6 pulgadas
- Determina el tamaño de la cuerda "F" selecciona el número de parte básico de la tabla anterior

Posición extendida → Posición retraída

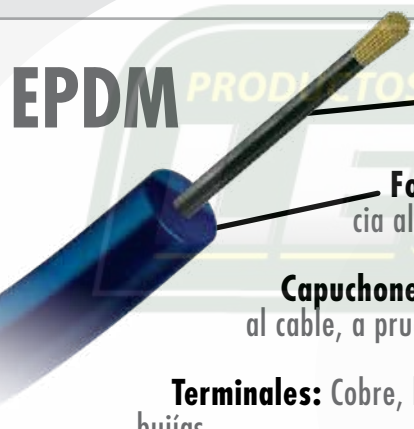

#### Para cables de nuevos

- Determina la longitud total
- Mide el viaje requerido, agrega 1/4" y entonces giralo hacia arriba para acercarlo a la pulgada siguiente
- Determina las cargas y selecciona el número de parte básico de la tabla A. Así como el método para ordenar un cable de control
